

GAMESMARKET

Access to GamesMarket from an IP-Enabled Network

For institutions with GamesMarket IP Access

If your institution has subscribed to [GamesMarket IP Access](#), you can access all GamesMarket content, including all content behind the paywall, free of charge and without logging in. This works only while logged into authorized LAN and Wi-Fi networks.

Prerequisite

Your institution has activated access to GamesMarket. If this has not yet been done or if there are issues with activation, the institution can contact service@gamesmarket.global via email at any time.

Access

Access is via the link proxy.gamesmarket.global (without **https** or **www**, exactly as shown here). When you visit the site via this link, you can view all content from the authorized network without logging in, including content behind the paywall.

Feel free to **bookmark proxy.gamesmarket.global** on fixed workstations and share the link or **QR code with students during lectures**.

It is also possible to display a QR code at select events within the institution so guests can enjoy the service as well. Please feel free to contact us again here to discuss this further.

Troubleshooting

If you encounter any problems, please feel free to contact service@gamesmarket.global at any time.
